## Description

The CT-0155TSP-KB8L-A from Coretek Opto Corp. is the high performance and cost-effective module for serial optical data communication applications specified for single mode of $155 \mathrm{Mb} / \mathrm{s}$. It operates with +3.3 V power supply. The module is intended for Single-mode fiber, operates at a nominal wavelength of 1550 nm and complies with Multi-Source Agreement (MSA) Small Form Factor Pluggable (SFP). Each module consists of a transmitter optical subassembly, a receiver optical subassembly and an electrical subassembly. All of them are housed in a plastic package and the combination produces a reliable component.

The module is a duplex LC connector transceiver designed to provide an ATM/SONET OC-3/SDH STM-1 compliant link for $155 \mathrm{Mb} / \mathrm{s}$ long reach applications. The characteristics are performed in accordance with Telcordia Specification GR-468-CORE.

## EMC

Most equipment utilizing high-speed transceivers will be required to meet the following requirements:

1) FCC in the United States
2) CENELEC EN55022 (CISPR 22) in Europe

To assist the customer in managing the overall equipment EMC performance, the transceivers have been designed to satisfy FCC class B limits and provide good immunity to radio-frequency electromagnetic fields.

## Eye Safety

The transceivers have been designed to meet Class 1 eye safety and comply with EN 60825-1.
